MAGAZINE

We are huge believers in having *something real* to hang on to. In the digital society we live in, it's easy to forget to put photos on your wall or frame a pic for your nan or get an album to put on your coffee table.

The FL. Magazine is a different way of making sure you've got something tangible to share with family and friends. You get 3, so you can give one to the parents or grandparents too.

We're not talking a fancy album that needs white gloves to open here. *Let them look loved* , put them out on the coffee table, get coffee stains on them, turn the corners down on your fave pages... pretty much just treat them like you would any mag... because that means that they're being looked through and loved.

- *The Magazine* $1350
  Includes 3 copies approx. 150 – 200 pages
  Optional extras & quantity discounts available
